## Biography

Jiamin Wan's graduate education is in hydrology and geochemistry. Since graduation, she has been employed in the Energy Geosciences Division of Lawrence Berkeley National Laboratory, and is currently a Staff Scientist. Her research is focused on interfacial, wetting, and capillary phenomena in geologic materials, and on biogeochemical reactions and subsurface transport of contaminants, colloids and nano-particulates. Her studies under high-pressure and high-temperature reservoir conditions combine pore-scale microscopy of fluid interfacial dynamics with surface spectroscopy and macroscopic interfacial measurements to understand mechanisms controlling CO<sub>2</sub>, water, and oil interactions. She currently has over 70 publications in peer-reviewed journals. She has been the lead principal investigator for many projects over the past two decades, obtaining funding through competitive peer-reviewed processes.

## Research Interests

- **Interfacial phenomenon in hydrogeological media:** dynamic wetting and fluid-fluid interfacial tensions under atmosphere and elevated (deep subsurface) pressures and temperatures; colloid stability, partitioning, and transport.
- **CO<sub>2</sub> enhanced oil recovery (CO<sub>2</sub>-EOR):** altering CO<sub>2</sub> apparent viscosity (using foams) and varying wettability to control fluids mobility; to test these in high-pressure micromodels and cores.
- **Hydraulic fracturing:** developing new fracturing fluids as the alternative to water-based fracturing fluids; understanding the fluids-rock interactions and manipulating the interfacial properties.
- **Geological CO<sub>2</sub> sequestration:** studies of mechanisms controlling CO<sub>2</sub> mobility and trapping, and caprock integrity through pore-scale microscopy, surface spectroscopy, and macroscopic interfacial measurements under elevated P-T conditions.
- **Contaminant biogeochemistry and plume remediation:** studies of reactions, transport, and remediation of contaminants including U and Cr.
- **Soil C and N transport and transformations and their impacts on C cycling:** from the unsaturated zone to groundwater.

## Education

- Ph.D. Hydrology, 1989-1993, New Mexico Institute of Mining and Technology, NM, USA
- Ph.D. Candidate in Geochemistry, 1986-1989, New Mexico Institute of Mining and Technology, NM, USA (past the candidacy exams and then switched to Hydrology)
- M.S. Geochemistry, 1981-1984, Institute of Geochemistry, Chinese Academy of Science, China
- B.S., Chemistry, 1977-1981, Beijing University of Iron and Steel Technology, China

## Professional Experience

- 1997- Present: Staff Geological Scientist, Energy Geosciences Division (formerly ESD), LBNL
- 1995 -1997: Scientist, Earth Sciences Division (ESD), LBNL
- 1993 -1995: Postdoctoral Research Fellow, Earth Sciences Division, LBNL
- 1989 -1993: Graduate Research Associate in Hydrology, New Mexico Tech, NM
- 1984 -1986: Research Associate, Institute of Geochemistry, Chinese Academy of Sciences
